

# Feeding Instructions

## Amino-B Booster®

[www.honeybhealthy.com/](http://www.honeybhealthy.com/)

Honey-B-Healthy, Inc. recommends preparing syrup using the following steps. Allow syrup to cool to room temperature prior to adding Honey B Healthy® feeding stimulants.

### Syrup Preparation Steps

#### SPRING & SUMMER

1. Mix syrup at a ratio of  
**SUGAR:WATER**  
**1:1**

#### FALL

1. Mix syrup at a ratio of  
**SUGAR:WATER**  
**2:1**

2. Bring syrup to a boil, if desired, or just use warm water to dissolve sugar. (Boiling is unnecessary with Honey B Healthy® products.)
3. Allow syrup to cool.
4. Add HONEY B HEALTHY® and AMINO-B BOOSTER® stimulants per recommended dosage chart below.

### Mixing Ratios

(US Standard)

Recommended starting does - 1 tsp. per quart.

#### FEEDING STIMULANT or DRENCH

Amino-B Booster®	Honey B Healthy®	Syrup
1-2 tsp.	1 tsp.	1 Quart
4-8 tsp.	4 tsp.	1 Gallon

**AMINO-B BOOSTER® MUST BE FED WITH HONEY B HEALTHY® TO MAINTAIN STABILITY OF AMINO ACIDS.**

### Amino-B Booster® Uses:

#### Feeding Stimulant

Adding equal amounts of Honey B Healthy® Original and Amino-B Booster® to syrup will provide important overall health benefits to the colony while helping to keep the syrup fresh.

FEED WITH HONEY SUPERS OFF.

#### Drench

Drench using the same mixture as used for feeding. Drench weak colonies with 8-12 ounces to give them a boost for brood rearing.

#### IMPORTANT:

Use clean feeding containers. If storing mix for a short period of time, keep tightly sealed, dry and cool. Do not return mix back into container. Avoid using prior to long winter clusters unless preparing colonies for early pollination.
