

Feeding Instructions www.honeybhealthy.com/ Honey B Healthy® Original

Honey-B-Healthy, Inc. recommends preparing syrup using the following steps. Allow syrup to cool to room temperature prior to adding Honey B Healthy® feeding stimulants.

Syrup Preparation Steps

SPRING & SUMMER

- Mix syrup at a ratio of
SUGAR:WATER
1:1

FALL

- Mix syrup at a ratio of
SUGAR:WATER
2:1

- Bring syrup to a boil, if desired, or just use warm water to dissolve sugar. (Boiling is unnecessary with Honey B Healthy® products.)
- Allow syrup to cool.
- Add HONEY B HEALTHY® stimulant per recommended dosage chart below.

Mixing Ratios

(US Standard)

Recommended starting dose - 1 tsp. per quart.

FEEDING STIMULANT	Honey B Healthy®	
	Syrup	
FEEDING STIMULANT	1-2 tsp.	1 Quart
	4-8 tsp.	1 Gallon
	1 Quart	50 Gallons
SPRAY or DRENCH	Honey B Healthy®	
	Syrup	
SPRAY or DRENCH	4 tsp.	1 Quart
	16 tsp.	1 Gallon
	1 Gallon	50 Gallons

HBH® Uses:

Feeding Stimulant

Use as an additive to sugar-water feeds, drenches and patties to help accelerate the buildup of nucs, packages, swarms and small or weakened colonies during early spring, fall or dearths of nectar.

FEED WITH HONEY SUPERS OFF.

Spray

Combine with sugar-water and use as a spray instead of smoke to calm bees and combine weak colonies. Spraying on new plastic foundation helps encourage acceptance at the drench dose.

Drench

Apply 8 oz. (depending on colony size) 3-4 times, 3-4 days apart to the brood area by spraying or drizzling the mix on the bees and between the brood frames on failing colonies.

NOTE: NOT RECOMMENDED TO DRENCH OR SPRAY PACKAGES.
